

## GUIDE AND INVENTORY TO THE JOB FILE OF THE INSPECTIONAL SERVICES DIVISION 1974-1994

### MISSION

The "ISD Job File" is the basis for the archives of the Inspectional Services Division (ISD) and is an especially important research tool because the mission of the ISD was to aid the Chief of Police and his staff in improving the management and operation of the Police Department. The goal, relatively unchanged over the twenty year span of the Division, was achieved through planning, research, and evaluation designed to provide useful systems, methods, procedures, and policies which were employed to control and improve the quality of performance throughout the Department. Staff and spot inspections were conducted to audit and review the operational and administrative functions of the Department and to ensure compliance with Department directives and policies. The ISD also was responsible for planning, coordinating and administering the Departments budget process.

The planning and research functions included development and utilization of the Patrol Car Allocation Model (PCAM) to recommend patrol deployment and budgeting processes through computer modeling. Activities also included development and evaluation of grant projects, computer systems for dispatching and geographic information systems, long range planning, and evaluation of Environmental Impact Statements to indicate impact on Department resource needs.

### HISTORY

The Planning and Research activity of the Seattle Police Department is believed to have originated in 1961 when Chief F. C. Ramon assigned a police supervisor to the City's Century 21 Worlds Fair on a full-time basis. It was stated that the presence of this officer (located in the Staff Division) gave the Police Department considerable insight into the projected activities of the Fair and enabled police planning to be incorporated into such things as physical structure, security procedures, personnel handling and other matters of vital concern.

## HISTORY cont'd.

In 1962 the unit was renamed Planning and Inspection but reverted to Planning and Research in 1963 which held through 1968 when it was again renamed the Planning and Research Bureau reporting directly to the Deputy Chief of the Staff Division, C. A. Rouse.

In 1969 an Inspectional Services Bureau was formed under Assistant Chief A. C. Gustin with an Inspections Division under Captain Larry McCready. During this period of time the IACP (International Association of Chiefs of Police) conducted a detailed analysis and review of the Department's operations. This report suggested a number of reorganizational moves that were implemented over the next few years.

In 1970, The Administrative Services Bureau, under Assistant Chief Eugene M. Corr, contained an Inspections Division and a Research and Development Division. In September of 1970 a Management & Analysis Team was appointed headed by Calvin C. Clauson. The Research and Development Division continued in 1971 through 1972 under Captain C. R. Connery.

In 1973, Research and Development was renamed the Research and Inspections Division, now under Major C.R. Connery, reporting directly to the Chief of Police. In 1974, the Research and Inspection Division was renamed the Inspectional Services Division (ISD) where it continued substantially intact, reporting to the Chief of Police for the next 20 years.

A detailed study of the Inspections & Planning functions between the years 1968 and 1976 was undertaken by Randy Tibbs in 1976. Notes were accumulated but no formal report was located (ISD Job No. 77-146).

The Commanders of the Inspectional Services Division were:

<u>MAJORS</u>	<u>IN</u>	<u>OUT</u>
Ray Connery	Nov. 1973	Dec. 1975
Don Kelsey	Jan. 1976	Sep. 1977
Larry McCready	Oct. 1977	May 1978
Ray Connery	Jun. 1978	May 1979
Dave Grayson	May 1979	Mar. 1981
Dale Douglas	Apr. 1981	Jan. 1982
Herb Johnson	Jan. 1982	Jan. 1986
Mike Brasfield	Jan. 1986	July 1990
Jim Deschane	July 1990	Apr. 1992
John Pirak	Apr. 1992	Mar. 1995

## HISTORY cont'd.

The last the of the ISD identity disappeared during 1995 as functions were assimilated into four new Bureaus.

## FUTURE

In 1994 the ISD was completely restructured. Revised activities began in 1995 with:

1. Research and Grants reporting to the Community Policing Bureau.
2. The PCAM project reporting to the Special Deployment Section of the Operations Bureau.
3. The Finance and Planning functions (including review, coordination, and response to Environmental Impact Statements) reporting to the Support Bureau, and
4. The Inspections and Operational Procedures functions reporting to the Training, Procedures and Audit Section of the Professional Responsibilities Bureau.

## THE RECORDS

The Records included in the ISD Archives run from approximately 1969 through 1995 with the greatest bulk falling truly between 1974 and 1994.

In accordance with the State of Washington's Records Retention Disposition policies, the records series that were developed were each given a specific retention period. These ranged between one year, current year plus three, and permanent.

Control and access to specific records in the Job File was developed concurrently with the introduction of electronic word processing equipment. This system was documented in an article published in The Police Chief, October 1978, entitled "A Job Control System for the Inspection and Planning Section of the Seattle Police Department".

## THE COLLECTION

The ISD Job File contains the core of the work done for the Chief of Police over a 20 year period. In addition, certain ISD records and record series have been placed as follows:

The "Studies and Surveys of the SPD" and "Research Requests and Research Reports" have been placed in the Subject File as is. Other related documents are being added to these records series to facilitate access.

Other major products of ISD work included Annual Reports, Grants, Inspections, and Manuals of Rules and Regulations. These documents appear in the ISD Job File. Additional copies of finished products may appear in separately identified files for easy access because they (have been merged with similar documents produced before 1974 and will undoubtedly include similar documents produced after 1994.

The ISD Job File, Inspections Reports File and Manual File are located in a basement vault of the Public Safety Building. Approximately five cubic feet of ISD job file records remain in actual files of the Training, Procedures and Audit Section covering the years 1990-1994. As their current plus three year retention period in the office expires, these records will be placed into vault storage. In the future, this entire collection will receive a more thorough review to further purge and refine the collection.

## ACCESS

All of the ISD collection is under the direct supervision and control of the SPD Acting Commander of the Records, Evidence & Identification Section, Judy deMello. Access to the entire ISD collection in the basement vault is obtained through Judy deMello.

Primary interest in the ISD Job File, Inspections Reports, and Manual Files is with the Inspections and Operational Procedures units which report to the Training, Procedures, and Audit Section of the Professional Responsibilities Bureau. The Inspections and Operational Procedures units have developed and maintain a computerized index of the Job File and their successor audits and procedures responsibilities.
